Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, and 18, drawn to compounds of substituted indolyl, pharmaceutical compositions thereof, classified in classes 514 and 548, various subclasses depending on substituents.
- II. Claims 10-17, drawn to a method for the modulation of the catalytic activity of a protein kinase, classified in classes 514, various subclasses depending on substituents, and 435, subclass 7.1+. Further restriction will be required if this group is elected.
- III. Claims 19-37, drawn to a **pharmaceutical kit** useful for the treatment of HIV infection, classified in class 514, various subclasses depending on substituents.

The inventions are distinct, each from the other because of the following reasons:

The invention of group I is drawn to compounds and compositions, while those of group II and III are drawn to method of use. A reference reading the compounds would not necessarily anticipate or render obvious the methods of use. Furthermore, the invention of group II had the additional search in the class for bioassay since the term "modulating" seems to suggest a bioassay rather than a treatment.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their divergent subject matter, and the search of the three distinct inventions would indeed impose a serious burden upon the examiner in charge of this invention, restriction for examination purposes as indicated is proper.

Art Unit: 1624

On 5-15-04, a voice message was left for Ms. Beth Burrous (at 202-672-5475) to request an oral election to the above restriction requirement, but did not result in an election.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and method claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn method claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined method claims will be withdrawn, and the rejoined method claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, **to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112.** Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and method claims may be maintained. Withdrawn method claims that are

Art Unit: 1624

not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the method claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
